

Household & Family Income

Figure 1.10 compares household and family income for Bayfield County. A household consists of all people who occupy a housing unit regardless of relationship. A household may consist of a person living alone or multiple unrelated individuals or families living together. A family consists of two or more people (one of whom is the householder) related by birth, marriage, or adoption residing in the same housing unit.

According to American Community Survey 5-Year Estimates 2017-2021, the median household income was \$62,859, and the median family income was \$73,373. Because many households consist of only one-person, median household income is usually less than median family income.
